

MIND MAPPING IN WRITING

*Sh. Tursunova*¹, *A. Qaxramonova*²

Abstract:

Mind mapping in writing is like developing a seen roadmap for your thoughts and ideas. Imagine a large tree with branches going every which way, and each branch represents a one-of-a-kind idea, subtopic, or detail. It's a tremendous way to prepare your thoughts before diving into writing, and it can genuinely help to prevent writer's block. So, how does it work? Well, you commence with a central theme or predominant thinking in the center of the page. This ought to be the theme of your writing, the theme of an essay, or the central argument of a search for paper. Then, you draw traces (or use a digital tool) to be a part of associated ideas, subtopics, or details, branching out from the center. Each of these linked thoughts can moreover spawn their very own sub-ideas, developing a branching shape that captures the complexity of your thoughts.

Key words: effect, using, mind mapping, technique, writing, descriptive text.

I. Introduction

Mind mapping used to be developed as an high quality technique for generating ideas with the aid of association. In order to create a thought map, you generally begin in the middle of the web page with the central theme/main thinking and from that factor you work outward in all instructions to create a growing format composed of keywords, phrases, concepts, facts and figures. It can be used for assignments and essay writing specially in the preliminary stages, where it is an perfect strategy to use for your 'thinking'. Mind mapping can be used for generating, visualizing, organising, note-taking, problem-solving, decision-making, revising and clarifying your university topic, so that you can get began with assessment tasks. Essentially, a thought map is used to 'brainstorm' a theme and is a awesome strategy for students.

II. Theoretical Review

According to Harmer (2004: 4), —writing is used for a wide variety of purpose it is produced in many different forms. There are four elements of the writing process. They are planning, drafting, editing and final drafting. It tells us something about the writing process. The types of writing are lists, letters, essays, reports or novel. The medium is written in pen and paper, computer word files. Writing is a complex activity in which the writer draws on a range of knowledge and skills and this complexity makes it unlikely that the same individual will perform equally well on different occasions and tasks (Weigle, 2002: 234). From the definition above the research conclude that writing is a way to product language that comes from our thought. By using writing, we can share our idea, feeling or anything that exist in

our mind. It is written on paper or a computer screen. It is influenced both by personal attitudes and social experience that the writer bring to write and the impact of the particular political and institutional context. It is also a process that we write is influenced by constraints of genre and has to be present in learning. Before you can begin to write your essay paper, you have to first recognize and determine what the 'main' idea of your writing will be. What is the central theme/main thought or controlling point that you are trying to carry to your reader? Whatever the topic, it is continually a precise notion to think about the issues that encompass that topic and mind mapping is an incredible structure of brainstorming. The facts that comprises your paragraphs should have a relationship to that controlling point. The choice about what to include in your paragraphs in the end starts with your ideas. Ideally, each paragraph in an essay should incorporate one idea or cover one element applicable to the central theme on your idea map.

To attain higher degrees of concentration and creativity, together with higher business enterprise and more concise communication, idea mapping may be an effective approach for you to consider.

The benefits of thought mapping are many and varied. In precis they include: giving you an overview of a massive subject/broad subject and permitting you to characterize it in a more concise fashion, encouraging you to see the better image and innovative pathways, enabling you to plan/make preferences about the selection of resource material you have for an assignment and the place you are going to place it, presenting you with a extra appealing and enjoyable format for your eye/brain to look at, muse over and remember.

If you have the possibility to choose the subject for your paper yourself, attempt to locate one that's been included by other researchers earlier than however still offers you a hazard to come up with new findings and conclusions. If you pick out a topic that has already been explored in depth by means of a gazillion different researchers, you might be hard-pressed to boost a unique perspective.

Ideally, the theme ought to be something you are also individually interested in, or at least some thing you can relate to in some way. This will make the total venture of writing your essay a little much less dreadful. The best way to discover such a subject is a brainstorming session.

Create a new questioning map and actually write "My Essay" or "My Paper" in the core of the map. Now, start adding ideas round the center. These can be things your professor suggested, associated subjects you mentioned in class, or whatever else relevant to get you started. Next, be aware down your very very own areas of interest and see the vicinity they intersect with the former. Once you have a few correct ideas for the undertaking of your paper, you can begin weighing them against each and each other, noting down gurus and cons. Eliminate matters until you're left with entirely one. This will be the trouble depend of your paper. In the occasion below, the solely requirement that had been given used to be as soon as to write a paper about literature from the English Renaissance. You'll see extra than a few well-known writers of this time mentioned in the map, as correct as various aspects of their work that can also additionally choose to be examined in a paper, such as the symbolism, dramatic conflicts or themes.

III. Conclusion

To wrap things up, we would tie it all together and emphasize the overarching price of questioning mapping in the writing process. Perhaps we may additionally prefer to leave the readers with a tremendous identify to motion or an encouragement to furnish thinking mapping a try if they haven't already.

Now, as for the writing style, we would opt for to hold things engaging and conversational. We're aiming for a tone this is informative but additionally exciting and
